New Courses at UTSI

**TS16949 Internal Auditor Training** - Dates: April 6 – 8, 2016
This internal auditing course caters to the full spectrum of auditor responsibilities – from process auditing to audit program management. This course will teach you the fundamental tools necessary to conduct audits using the automotive process approach while providing vital strategic information to top management.

Duration: 3 Days
Price: $1495/person

**Six Sigma Green Belt Training** - Dates: March 22-24, April 19-21, May 17-20
Green Belt is the foundational level of Six Sigma expertise. Team members with this training integrate Six Sigma implementation into their primary job duties. Six Sigma is a set of techniques and tools which seeks to focus on customer requirements through minimizing variability in manufacturing and improving process quality.

Duration: 10 Day Course Delivered over Three Sessions (participants must attend all three sessions) – note remaining open seats are limited.
Price: $2500/participant

Requirements: Participants must provide a laptop preloaded with Minitab Statistical Software

Additional Information: In order to achieve full green belt certification, participants must complete a company specific project resulting in a minimum of $50,000 in savings. Project mentoring may be provided at an additional cost based on project scope.
