SPRING SEMESTER 2009

REGISTRATION PROCEDURE

ADVISING

Graduate students should contact their departmental faculty to arrange an advising appointment. The web registration system will ask if you have discussed your program with your advisor. Answer “yes” if you have.

REGISTRATION

UTSI students MUST register for the 2009 Spring semester on the Web at Circle Park Online https://cpo.utk.edu/CPOWeb/. The registration system will be available Monday through Saturday, 6:00 AM - 11:00 PM (CST) and Sundays 12:00 PM - 5:00 PM (CST). Registration will be September 29, 2008 – January 2, 2009. Late registration will be January 3, 2009. Classes begin Thursday, January 7, 2009.

Plan your schedule. Here’s a table to help with this process:

Students log on to CPO using their Net ID and password. If you do not know your Net ID and Password, please visit the University Registrar's website at http://registrar.tennessee.edu/student_id.shtml. Scroll down the page to "What is a Net ID and Net ID password?" You will find helpful information about obtaining Net IDs and Net ID passwords.

CPO Technical Support: Send email including your return email address in the text of your message to cpo@utk.edu

Days of the Week

M-Monday    T-Tuesday    W-Wednesday    R-Thursday    F-Friday    S-Saturday
Financial Calendar for Spring Term 2009

Last Registration Day for Receiving Statements by Mail December 5, 2008

Statement Information Available on CPO December 8, 2008

Priority Registration Payment/Confirmation Deadline January 2, 2009 (3:30 pm CST)

Late Registration/Late Fees Begin January 3, 2009

Late Payment and Confirmation Deadline January 16, 2009 (3:30 pm CST)

CREDIT CARD PAYMENTS

** NOTE: If you pay your fees using Circle Park Online (CPO) using a credit/debit card (Discover, VISA, Mastercard) you will be accessed a 2.5% service fee. To avoid this service fee you will need to make payment to the UTSI Business Office.

SPECIAL BILLING – THIRD PARTY BILLING:

The Business Office will generate a billing after the student has provided a letter of authorization from the third party sponsor. Authorization must include the sponsor’s name and address as well as the maximum amount which will be paid for each specific term. The authorization can be mailed to UTSI Business Office, MS#12, 411 B.H. Goethert Parkway, Tullahoma, TN 37388-9700 or email it to jboyles@utsi.edu. Since students are responsible for all University fees and charges, use of the third-party address as the student’s billing address is strongly discouraged.

STUDENTS ARE ULTIMATELY RESPONSIBLE FOR ALL CHARGES. THEY MUST COMPLETE A CONFIRMATION OF ATTENDANCE FORM AND MAKE CERTAIN MINIMUM PAYMENT AMOUNTS CREDITED OR AUTHORIZED ON OR BEFORE THE PAYMENT DUE DATE IN ORDER TO AVOID LATE PAYMENT FEE ASSESSMENT AND SCHEDULE CANCELLATION.

If you have any questions concerning third-party billing please call Jennifer Boyles at 931-393-7297 or 888-822-8874 ext 297 or by email jboyles@utsi.edu

TOLL-FREE NUMBERS

For a specific office: 1-888-822-UTSI (8874) and the extension number.
For general information: 1-888-822-UTSI (8874)
Admissions Office: 1-888-822-UTSI (8874)-432
Bookstore: 1-888-822-UTSI (8874)-204
Business Office: 1-888-822-UTSI (8874)-204
Registrar's Office: 1-888-822-UTSI (8874)-228

BOOKSTORE HOURS

The Bookstore is located in Lower C-Wing. The Bookstore hours are 8:00 a.m. - 4:00 p.m. All textbooks will be returned to the publisher one week after midterm. For further information
concerning books contact the Bookstore, ext. 204 or 314 or by email Robin Nee at mnee@utsi.edu or Vicki Carr at vcarr@utsi.edu

APPLICATION FOR ADMISSION

No student will be allowed to register unless a completed Application for Admission to the Graduate School of the University of Tennessee, Knoxville (UTK) is on file in the Registrar's Office. An Application for Admission to the UTK Graduate School must be accompanied by a $35.00 non-refundable application fee, payable to The University of Tennessee Space Institute. Applicants are required to provide one official transcript of all undergraduate and graduate records. Students may apply on-line at http://admissions.utk.edu/graduate/apply.shtml [click on APPLY ONLINE and Follow Directions]. Applications for Admission and Transcripts from part-time students should be sent to the Registrar's Office, A102, Mail Stop 7, UTSI, Tullahoma, TN 37388-9700. Full-time students send Application for Admission, transcripts, GRE scores (if required); and if international application, TOEFL scores to the Admissions Office, A104, Mail Stop 5, UTSI, Tullahoma, TN 37388-9700.

PAYMENT OF FEES

Payment of fees is due at time of registration. Late fees will begin on January 3, 2009. The only credit/debit cards The University of Tennessee Space Institute accepts are Visa, MasterCard and Discover.

FEES OF DISTANCE STUDENTS

Distance students should contact their departmental coordinator to determine the amount of the access fee.

Aviation Systems  Stephen Corda  931-393-7413 scorda@utsi.edu
Engineering Mgt.  Gregory Sedrick  931-393-7292 gsedrick@utsi.edu

TUITION AND/OR MAINTENANCE FEES*

Full Fees For In-State Students (per semester)

| Maintenance Fee | $3,131.00* |
| Programs and Services Fee | 90.00 |
| Total | $3,221.00 |

Full Fees For Out-Of-State Students (per semester)*

| Maintenance Fee | $3,131.00* |
| Programs and Services Fee | 90.00 |
| Tuition | $6,329.00* |
| Total | $9,550.00 |

*All fees are subject to changes approved by the Board of Trustees prior to the beginning of the term.
TUITION FOR PART-TIME STUDENTS

Part time students may elect to pay fees computed by the semester hour credit as follows:

<table>
<thead>
<tr>
<th></th>
<th>IN-STATE</th>
<th>OUT-OF-STATE</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$348.00 per semester hour</td>
<td>$1,052.00 per semester hour</td>
</tr>
<tr>
<td>3 hrs.</td>
<td>$1,044.00</td>
<td>$3,156.00</td>
</tr>
</tbody>
</table>

PROGRAMS AND SERVICES FEE

All students enrolled in nine semester hours or more for Fall or Spring Semester are assessed an activity fee of $90.00 per semester. Part-time students taking fewer than nine hours will be assessed at the rate of $10.00 per semester hour. The Programs and Services Fee is non-refundable. Research Assistants and Fellowship/Scholarship Students who may have a waiver of fees (tuition), must pay appropriate University Programs and Services Fee.

Part-time students enrolled for videotape classes at off campus centers and students residing out of state are not required to pay the Programs and Services Fee.

RETURNED CHECK POLICY

All checks are deposited the day they are received. A $30.00 service charge will be assessed when checks fail to clear the bank on which drawn. In addition, if the returned check is in payment of initial fees and charges, the late payment fee in effect at the time the check is redeemed will be added to the returned check service fee. Returned checks will not be re-deposited. Cash or a cashier’s check is required for payment of a returned check, late fee, and service charges. Failure to clear returned checks will result in the forfeiture of all University services including the receipt of grades, transcripts, and schedules of classes.

DEFERRED PAYMENT PLAN

Although fees, rent and other University expenses are due and payable at the beginning of each term, a full-time student in good financial standing with a definite anticipated source of funds may request the deferment of up to 50% of the total charges at registration. The deferred payment must be paid by the 45th (February 13, 2009) day of the semester. All financial aid monies must be applied to fees before a deferment will be considered. A deferred payment service fee of $20.00 is assessed when any portion of tuition, fees, and other charges are deferred with the approval of the Business Office. An additional $35.00 late payment charge will be assessed if the second installment is not paid on or before the due date. For more details, contact the Business Office.

LATE PAYMENT FEES

A Late Payment Fee of $35.00 will be added to each VOLXpress account if the minimum payment amount which is printed on the statement is not received by the Bursar’s Office on or before the published due date. This does not include beginning of term registration statements which will result in cancellation of schedules if the minimum payment is not met. Late payment fees are exclusive of all other charges and are due when assessed whether or not the student receives a VOLXpress statement. Accounts are subject to a late fee of $45.00 if there is
an account balance at mid-semester. The fee is assessed in addition to the unpaid fees and charges and the account balance must be paid in order to access registration services, receive a transcript, grades, or a diploma.

**TUITION/FEES POLICY FOR DROPPED COURSES OR WITHDRAWAL**

THE PERCENTAGE TUITION REFUNDS SPECIFIED ON THE FOLLOWING PAGE ARE APPLICABLE WHEN A STUDENT DROPS ONE OR MORE COURSES (INCLUDING TOTAL WITHDRAWAL). Students who drop courses and continue with a reduced course load are eligible for a refund only if the total charges at the semester hour rate for the courses continued plus the percentage assessed at the semester hour rate for the courses dropped results in an amount less than that paid. The Programs and Service Fee is non-refundable.

*******************************************************************************

A COURSE IS NOT OFFICIALLY DROPPED UNTIL A CHANGE OF REGISTRATION FORM HAS BEEN PROCESSED BY THE REGISTRAR'S OFFICE. CANCELED COURSES OR FAILURE TO ATTEND CLASS DOES NOT AUTOMATICALLY WITHDRAW OR DROP A STUDENT FROM THE UNIVERSITY OR CLASS --- A CHANGE OF REGISTRATION FORM MUST BE COMPLETED.

*******************************************************************************

The following percentage assessments are applicable for courses dropped (if fees are assessed at the semester hour rate):

<table>
<thead>
<tr>
<th>DROP DATE</th>
<th>CHARGE</th>
<th>REFUND</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 7 - 11</td>
<td>NO CHARGE</td>
<td>100%</td>
</tr>
<tr>
<td>January 12 - 17</td>
<td>20% CHARGE</td>
<td>80%</td>
</tr>
<tr>
<td>January 18 - 22</td>
<td>40% CHARGE</td>
<td>60%</td>
</tr>
<tr>
<td>January 23 – 27</td>
<td>60% CHARGE</td>
<td>40%</td>
</tr>
<tr>
<td>January 28 - End of Term</td>
<td>100% CHARGE</td>
<td>NO REFUND</td>
</tr>
</tbody>
</table>

**TUITION/FEES REFUND POLICY FOR WITHDRAWALS**

Withdrawal from school for the term after registration has been processed, even though classes have not been attended or fees paid, must be by official notification to the Registrar's office. The effective date of withdrawal is the date the Registrar's office is notified by completion of the Change of Registration request form. FAILURE TO ATTEND CLASS DOES NOT AUTOMATICALLY CANCEL ENROLLMENT. The appropriate percentage of fees will be charged unless the Registrar's Office is notified by the close of the last day designated for registration and before the first official day of classes for the semester or term.

WITHDRAWAL DOES NOT CANCEL FEES AND CHARGES ALREADY INCURRED. THE DROP/ADD PROCEDURE CAN NOT BE USED TO WITHDRAW FROM SCHOOL FOR THE SEMESTER OR TERM. When a course is canceled by UTSI administration, the students who have registered for the course will be notified by either the instructor and/or the Registrar's Office and required to file a Change of Registration form with the Registrar's Office, UTSI, Room A102, 393-7228.

The University of Tennessee Space Institute, in accordance with federal regulations, follows the policy and procedures below for calculating refunds and repayments for financial aid.
REFUNDS

Refunds are defined as the portion of maintenance and/or tuition and University housing charges due as rebate when a student withdraws or is expelled from the University. The amount of a refund is determined by the Drop Date Charge fee table on this page.

REPAYMENTS

Repayments are defined as that portion of aid, received by a student after the University direct charges have been paid by that aid, that must be repaid by a student when a student withdraws or is expelled. The amount of the repayment is determined by the Drop Date Charge fee table on the previous page.

Refunds and repayments to the Title IV programs are determined according to the formula published in the current Federal Student Financial Aid Handbook. The Business and Admissions Offices are responsible for determining the amount of the refund and/or repayment and distributing the correct amount back to the financial aid programs according to the Refund/Repayment Allocation Policy.

WITHDRAWAL (TOTAL) FROM THE UNIVERSITY

If, after registering for classes and either returning your fee payment or your Confirmation of Attendance form to the Bursar’s Office, you decide not to enroll for this term, you must immediately notify the Registrar’s Office at UTSI. If you withdraw officially on or before a Change of Registration deadline, but after the no “W” deadline for a particular session, the grade of “W” will be issued.

GRADES

Students may obtain their grades through the web at https://cpo.utk.edu/CPOWeb/enterCPO.jsp or by calling 865-656-2527. Grades will not be mailed unless a printed copy is requested through the web address. Students will be prompted to enter their ID number and their Personal Security Code. There is a limit of 8 telephone calls per student, per semester. Unlimited access is available via the Internet. Grades may also be obtained through the Registrar’s Office at UTSI.

GRADUATE STUDENTS CHANGE OF REGISTRATION AFTER THE DEADLINE

To change registration in any way after the deadline, a graduate student must present a request, signed by the instructor(s) and adviser as evidence of their knowledge of the request to the Registrar’s Office at UTSI. Graduate students must verify that ALL changes have been approved by their academic adviser. If the Office of Graduate Student Services approves the change of registration, the change will be noted on the student’s permanent record. THE DROP DEADLINE FOR GRADES AND THE DROP DEADLINE FOR FEE REFUNDS ARE NOT THE SAME.
FULL-TIME STUDENTS

Students enrolled in at least 9 semester hours during the Fall/Spring semesters or 6 hours in the Summer Term are considered full-time students. Research Assistants must be full-time students and also enroll in one of the MABE 595 seminars or a PHYS 599 seminar each term, unless a waiver is granted by the Dean for Academic Affairs.

REMOVAL OF INCOMPLETE GRADES

All Incomplete Grades (I) must be removed within one semester, excluding the Summer Term. If a supplementary grade report has not been received in the Registrar's Office at the end of the following semester, the I will be changed to an F. The course will not be counted in the cumulative grade point average until a final grade is assigned. Students wishing to graduate Spring Semester 2009 must remove all INCOMPLETE GRADES by April 24, 2009.

It is the responsibility of the student to contact the instructor and the instructor's responsibility to complete a Grade Change form. The Registrar's Office cannot change a grade on verbal instructions only.

REPEATING A COURSE

No graduate student may repeat a course for the purpose of raising a grade already received, with the exception of a NC course. A graduate student cannot do additional work nor repeat an examination to raise a final grade.

ADMISSION TO CANDIDACY

MASTER OF SCIENCE DEGREE:

Each M.S. student, including IE Capstone Project students, is responsible for submitting to the Registrar's Office a completed and signed Application for Admission to Candidacy form at least one semester prior to receiving the degree.

Candidacy committee changes or course changes must be submitted to the Committee Chairman using a Change of Committee/Course for approval. This form is available in the UTSI Registrar's Office.

ADMISSION TO CANDIDACY

DOCTOR OF PHILOSOPHY DEGREE:

A Doctoral Committee should be formed during the student's first year of doctoral study and submitted to the Registrar's Office for approval. The form is available in the UTSI Registrar's Office. Any changes to the doctoral committee (deletions or additions) must be done through the Registrar's Office. Each Ph.D. student is responsible for submitting to the Registrar's Office a completed Admission to Candidacy form signed by the Doctoral Committee at least one semester prior to receiving the degree. The Candidacy form must be approved by the UTK Graduate School before a student will be admitted to candidacy. The comprehensive examination must be passed prior to admission to candidacy.
CONTINUOUS REGISTRATION OF DOCTORAL STUDENTS

All doctoral students must be registered for doctoral dissertation research course 600 (minimum of 3 hrs.) on a continuous basis starting when the doctoral research proposal is approved, admission to candidacy is accepted, or registration for course 600 is begun, whichever comes first, including ALL Summer terms and the semester in which the dissertation is approved and accepted by The Graduate School. A leave of absence may be requested for extenuating circumstances. The procedure can be found in the UTK Graduate catalog.

FINAL EXAMINATION FOR NON-THESIS, CAPSTONE PROJECT STUDENTS, THESIS AND DISSERTATION STUDENTS

A candidate presenting a thesis or dissertation must pass a final oral examination on all work offered for the degree. The examination is scheduled through the Registrar's Office. Failure to notify the Registrar's Office of the examination date will put the student at risk for graduating that semester. Final examinations not properly scheduled MUST be repeated. The final draft of the thesis must be distributed to the committee members at least two weeks prior to the date of the final examination. In case of a grade of "Fail", the candidate may not apply for re-examination until the following semester. The result of the second examination is final.

UT POLICY ON INSURANCE FOR INTERNATIONAL STUDENTS

All foreign national students registered with the University of Tennessee, Knoxville, are required to have comprehensive medical insurance. The policy for the 2009 academic year is provided by United Health Care. The premium must be paid before registration. Contact the Admission and Student Affairs Office (A104 ext. 432) or email Callie Taylor at ctaylor@utsi.edu for further information.

GENERAL SEMINAR

A number of seminars of interest to all UTSI students and general public will be offered throughout the semester.

FINAL EXAM DATES FOR SPRING SEMESTER 2009

STUDY PERIOD....April 25, 26, 27, 2009
FINAL EXAMS......April 28, 29, 30, 2009

HONOR STATEMENT

The following Honor Statement is signed by all students applying to The Graduate School:

"An essential feature of The University of Tennessee, Knoxville is a commitment to maintaining an atmosphere of intellectual integrity and academic honesty. As a student of the University, I pledge that I will neither knowingly give nor receive any inappropriate assistance in academic work, thus affirming my own personal commitment to honor and integrity."

For official information on all UTK Graduate School policies, refer to the current UTK Graduate Catalog available in the Registrar's Office, A102.
The University of Tennessee Space Institute reserves the right to cancel any class with an insufficient number of students, or for other reasons.

THE UNIVERSITY OF TENNESSEE POLICY ON A DRUG-FREE CAMPUS AND WORKPLACE

In support of the Drug-Free Workplace Act of 1998 (Public Law 100-690) and the Drug-Free Schools and communities Act of 1989, the University of Tennessee is notifying all students, faculty, and staff of the following university policy approved by the UT Board of Trustees on 21 June 1990.

It is the policy of the University of Tennessee to maintain a safe and healthful environment for its students and employees. Therefore, university policy prohibits the unlawful use, manufacture, possession, distribution, or dispensing of drugs ("controlled substances" as defined in the Controlled Substances Act, 21 U.S.C. 812) and alcohol on university property or during university activities.

Violation of this policy is grounds for disciplinary action--up to and including immediate discharge for an employee and permanent dismissal of a student. Federal and state laws provide additional penalties for such unlawful activities, including fines and imprisonment (21 U.S.C. 841 et seq.; T.C.A. 39-6-401 et seq.). Local ordinances also provide various penalties for drug- and alcohol-related offenses. The university is bound to take all appropriate actions against violators, which may include referral for legal prosecution or requiring the individual to participate satisfactorily in an approved drug use or alcohol abuse assistance or rehabilitation program.
SPECIAL ANNOUNCEMENT

THOMAS JEFFERSON LECTURE

Thursday, April 20, 2009
(Tentative Date)

3:00 P.M.

UTSI Auditorium

TEXT: TBD
PROFESSOR: Dr. Gary Flandro

One-dimensional internal and external flow; waves; small perturbation theory; slender body theory; similarity rules; method of characteristics. Prerequisite: 521.

AE 535 MECHANICAL VIBRATIONS (3)
SEC. 001 (Same as ME 534/ES 534)
TIME: Tuesday & Friday  9:15 – 10:30  E210
TEXT: Lecture notes, handouts, reserved books form the Library
PROFESSOR: Dr. Gary Flandro

Vibrations of linear, discrete, undamped and damped systems. Lagrange’s equations for Modal analysis. Laplace transform. Response to mechanical transients. Prerequisite: Undergraduate vibrations course.
*AE  539  CONTINUUM MECHANICS (3) CANCELLED
SEC.  002  (Same as ES 539/ME 539)
TIME: Monday & Thursday  9:15 – 10:30  B112
TEXT: L. E. Malvern: Introduction to the Mechanics of a Continuous Medium; Prentice Hall,
ISBN# 13 487603 2
PROFESSOR:  Dr. T. H. Moulden

Cartesian tensors, transformation laws, basic continuum mechanics, concepts; stress, strain,
deformation, constitutive equations. Conservation laws for mass, momentum, energy.
Applications in solid and fluid mechanics.

AE  542  FLUID MECHANICS II (3)
SEC.  001  (Same as ES 542/ME 542)
TIME: Tuesday & Friday  9:15 – 10:30  E211
2. R.L. Panton: Incompressible Flow; Wiley Interscience; Latest publications
PROFESSOR:  Dr. Basil Antar

Inviscid flow, boundary layers, laminar jets, wakes and shear layers. Transition to turbulence.
Turbulent flow, Reynolds averaged equations, dynamics of turbulence, boundary free turbulent
shear flow, turbulent channel’s pipe flow, turbulent boundary layers.

AE  551  AEROSPACE MECHANICS (3)
SEC.  001  (Same as ME 551)
TIME: Tuesday & Friday  7:45 – 9:00  E211
TEXT: Class Notes
PROFESSOR:  Dr. Gary Flandro

Principles of mechanics applicable to aerospace vehicles, equations of motion, multibody
problems and trajectory analysis. Mission analysis, Lagrangian and Hamiltonian formulations,
rotating coordinate systems, orbital operations, advanced deep-space propulsion techniques
including solar sailing, gravity assist, and tether propulsion. Prerequisite(s): Mathematics 471.

*AE  557  AEROSPACE VEHICLE FLUTTER & VIBRATION (3) CANCELLED
SEC.  001
TIME: Monday & Thursday  7:45 – 9:00  B112
TEXT: TBD
PROFESSOR:  TBD

Aeroelastic phenomena. Structural and aerodynamic operators. Stability criteria for airfoils
operating in oscillating stream. Two-and-three-dimensional flutter of wings, control surfaces and
empennages. Prerequisite: 423, 551.

AE  590  SELECTED ENGINEERING PROBLEMS (1-3)
SEC.  001
PROFESSOR:  Dr. Gary Flandro
AE  595    SEMINARS: AEROSPACE and MECHANICAL SYSTEMS (1)
SEC. 001     Dr. Ahmad Vakili     (Same as ME 595)

Seminars in all phases of Aerospace Engineering, reports on current research at UTK and UTSI. May be repeated.

AE  599    AIRCRAFT DESIGN (3)
SEC. 001     (Cross-Listed as AS506 Section 001) Videotaped from UTSI
TIME: Tuesday & Friday  1:00 – 2:15  E112
PROFESSOR:     Dr. U. Peter Solies

Review of air vehicle aerodynamics and performance, design process, compromise of conflicting requirements, economical, industrial, and legal aspects. Definition of mission requirements, synthesis and optimization techniques, safety and reliability, systems integration, standards and regulations, teamwork and decision-making process.

*AE  599    SPECIAL TOPICS IN AE: COMPLEX FLOW DIAGNOSIS AND MANAGEMENT (3) CANCELLED
SEC. 003
TIME: Monday & Thursday  10:45 – 12:00  E210
TEXT: Selected chapters of J. Z. Wu, H. Y. Ma & M. D. Zhou; Vorticity and Vortex Dynamics,
PROFESSOR:     Dr. J.Z. Wu

While the analysis and behavior of an engineering flow is typically defined in terms of primary variables like the distribution of velocity and pressure in the flow, it is actually dominated by local dynamic processes and structures that cannot be characterized by primary variables themselves. In fact, it is the space-times derivatives of the fluid motion, such as vorticity, dilatation, pressure gradient, etc. that govern the behavior of the flow. To fully diagnose what key local processes/structures dominate the flow performance, and to rationally optimize the flow management (including configuration design and flow control), special theories are needed to re-express global performances by local dynamics. In this special course we present a conceptual discussion and critical review of the theories of this type. They are applicable to both external and internal flows, with large Reynolds numbers and wide range of Mach numbers. We exemplify the application of these theories by various worked-out numerical examples in both external and internal hydro- and aerodynamics, showing why the diagnosis and management based on local dynamics can lead to in-depth physical understanding and significant performance improvement.

PROFESSOR:  Dr. Trevor Moulden

AE  690  ADVANCED TOPICS IN AE:  LINEAR AND NONLINEAR WAVES (3)
SEC.  002  (Cross listed with ES 681 Section 001)
TIME: Monday & Thursday   4:15 – 5:30  B210
TEXT: GB. Witham: Linear and Nonlinear Waves
PROFESSOR:  Dr. John Steinhoff

The basic properties of many important physical phenomena can often be modeled by partial differential equations with simple nonlinear terms. These range from pattern formation in water waves to predator-prey dynamics and optical pulse propagation in fibers. Representative classes of equations will be studied and their solutions characterized. An important sub-topic will be solitary waves and especially solitons. Solitons have recently been extensively studied as very important and interesting solutions of many nonlinear partial differential equations: they propagate without changing shape, even after interacting with each other, they are represented in many important physical phenomena, from optical pulses to tidal bores, and are studied as models of elementary particles. The course will consist of a survey of the field followed by a study of the methods of solving nonlinear partial differential equations which lead to soliton solutions. The emphases will be on physical arguments and analysis. Prerequisite: include Elementary Partial Differential Equations and Advanced Calculus.

AVIATION SYSTEMS

AS  500  MASTER’S THESIS (1 - 15)
SEC.  001  Solies
002  Ranaudo
003  Corda
AS  502  REGISTRATION FOR USE OF FACILITIES (1-15)
SEC. 001  Corda
002  Solies
003  Ranaudo
004  Collins
005  Muratore
008  Pujol

Required for the student not otherwise registered during any semester when student uses University facilities and/or faculty time before degree is completed. May not be used toward degree requirements. May be repeated.

AS  506  AIRCRAFT DESIGN (3)
SEC. 001 (Cross Listed as AE 599 Section 001) (Videotaped from UTSI)
TIME: Tuesday & Friday  1:00 – 2:15  E112
PROFESSOR:   Dr. U. Peter Solies

Review of air vehicle aerodynamics and performance, design process, compromise of conflicting requirements, economical, industrial, and legal aspects. Definition of mission requirements, synthesis and optimization techniques, safety and reliability, systems integration, standards and regulations, teamwork and decision-making process.

AS  510  SPECIAL TOPICS: INTRODUCTION TO AVIONICS II (3)
SEC. 001 (Videotaped at UTSI)
TIME: Tuesday & Friday  10:30 – 11:45  E113
PROFESSOR:   Dr. Alfonso Pujol, Jr.

Avionic systems and communications, including analog and digital systems, distance measuring equipment, transponder, radar altimeter, GPS/satellite navigation, electronic flight instrument system, cockpit voice and flight data recorders, weather detection, traffic alert and collision avoidance system, electrical systems, aviation bands and frequencies, and other topics are also discussed.

AS  510  SPECIAL TOPICS: SYSTEMS ENGINEERING (3)
SEC. 002 (Videotaped at UTSI)
TIME: Monday & Thursday  1:30 – 2:45  E113
Inviting Disaster – Lessons from the Edge of Technology; James R. Chiles; ISBN 0-06-662081-3;
The focus of this course is on engineering problem solving in multi-disciplinary applications with complex systems interactions. Instruction will be provided in methodologies and tools used to deal with large complex systems to deliver system performance that meets user requirements. Methodologies discussed will include system life cycles, requirements development, verification and validation, engineering review processes, hazard analysis, fault trees, reliability block diagrams, system flow diagrams, weight and cost estimating, technical budget management, engineering economic analysis, interface control, and deterministic and monte carlo definition of integrated flight design environments. Special topics will include software integration; interconnect wiring, fault tolerance and redundancy management.

AS 510 SPECIAL TOPICS: HUMAN FACTORS IN CREW STATION DESIGN (3)
SEC. 003 (Interactive Video)
TIME: Tuesday and Thursday 10:15 – 11:30 E 112
TEXT: 1) Jarrett: Cockpit Engineering; 1st Ed., Ashgate
2) Harris: Human Factors in Civil Flight Deck Design; 1st Ed., Ashgate
PROFESSOR: Richard Ranaudo

Cockpit design criteria are presented for various fighter and transport aircraft relating to anthropometric and accommodation issues such as visibility, reach, strength, and body size. Criteria for design of various cockpit displays including head-up guidance, helmet mounted, and audio systems displays are presented along with conventional head-down display layouts. Issues relating to human information processing characteristics are related to mission analysis and display requirements. This course is designed for pilots, test pilots, and engineers involved in human factors and systems engineering. Prerequisite: AS 515 or permission of instructor.

*AS 510 SPECIAL TOPICS: HUMAN FACTORS DURING SPACE FLIGHT (3)
SEC. 004 (Video Taped at UTSI) CANCELLED
TIME: Tuesday & Friday 8:45 – 10:00 E113
TEXT: TBD
PROFESSOR: Dr. Gilles Clement

Current Problems, course description to be added at a later date.

AS 516 Flight Controls (Stability and Control)
SEC. 001 (Interactive Video)
TIME: Monday & Thursday 10:15 – 11:30 E113
PROFESSOR: Dr. Andrew Meade

Static and dynamic longitudinal, directional, and lateral stability of aerospace vehicles will be investigated. Topics include:

- Contribution of vehicle components to stability and control
- Motion with fixed and free control surfaces
- Steady flight and maneuvering flight
- Flight test techniques
- Introduction to control theory and design of automatic controls
AS 521 EXPERIMENTAL FLIGHT MECHANICS: FIXED WING PERFORMANCE (3)
SEC. 001
TIME: Tuesday & Friday 8:00 - 9:15 Tullahoma Airport Classroom
PROFESSOR: Dr. Stephen Corda

This course will cover fundamental theories, flight test techniques, and data collection and analyses for fixed wing aircraft performance. Topics will include air data system calibration, takeoff and landing performance, turn performance, cruise performance, energy concepts, and aerodynamic modeling. Course structure will be weekly classroom academics with approximately 4-6 flight labs evenly distributed during the semester. This course is designed for full-time attendance during the semester and will not be offered as a Distance Learning course.

AS 550 PROJECT IN AVIATION SYSTEMS (3)
SEC. 001 Corda
002 Solies
003 Collins
004 Ranaudo
005 Muratore
006 Pujol

Enrollment limited to Aviation Systems students in non-thesis program. May be repeated. Maximum 3 hrs allowed toward degree.

COMPUTER SCIENCE

NOTE: Students interested in the Interdisciplinary Graduate Minor in Computational Science (IGMCS) at UTSH should contact Dr. Bruce Whitehead (bwhitehe@utsi.edu, 931-393-7296) for further information.

CS 472 NUMERICAL LINEAR ALGEBRA (3)
SEC. 001 Videotaped from UTSI (Same as Math 472)
TIME: Monday & Wednesday 2:30 – 3:45 E112
PROFESSOR: Dr. Trevor Moulden

*CS 594 INTRODUCTION TO COMPUTER SCIENCE FOR COMPUTATIONAL SCIENTISTS (3) CANCELLED
SEC. 008 (Interactive Video originating from UTSI)
TIME: Wednesday 4:00 – 6:35 E113
Students in any field are welcome in this course, whether or not you're interested in the Interdisciplinary Graduate Minor in Computational Science (IGMCS). Topics include basic data structures, effective compiler toolchain use, Fortran/C interoperability, concurrency, parallel computing models & application programming interfaces (APIs), and cluster computing. Readings on each of these topics (available on the web) will supplement the textbook. Evaluation will be based primarily on 5 programming assignments spaced at intervals of 2-3 weeks throughout the semester.

Prerequisite: Either the C or Fortran programming language, but not necessarily both. We will learn enough C in this course to enable you to do the programming assignments in C if you want to learn how to program in that language. However, you can choose do do each assignment in either C or Fortran, in case you already know Fortran and are more comfortable using it.

In this course, we will use the gcc and gfortran (C and Fortran) compilers that are free, high quality, open source, and widely used. Instructions will be provided in the course for installing these compilers on Windows (XP or Vista) systems, as a part of the Cygwin software suite freely available over the Internet. (Linux users are also welcome, but prior knowledge of Linux or Unix is not necessary for this course.)

Although taught over interactive video, this course will be hands-on to the greatest extent possible. The topics in this course are learned best by doing, not just by listening to a lecture. If you own a laptop, you are strongly encouraged to bring it with you to each class meeting, so that you can tinker with and run example programs as we discuss them in class. (You are encouraged to do the same if you view a class meeting off-line.)

For further information about this course (or about the IGMCS program), please contact Dr. Whitehead at bwhitehe@utsi.edu or 931-393-7296.

CS 594 SPECIAL TOPICS: EMBEDDED SYSTEMS SOFTWARE DEVELOPMENT (3)
SEC. 007 (Cross-listed as ECE 599 Section 008)
TIME: Tuesday & Friday 1:00 – 2:15 E211
TEXT: TBD
PROFESSOR: Dr. Bruce Whitehead

This course aims to provide the knowledge, software tools, and hands-on experience necessary to develop efficient software for embedded systems. Topics include compiling software for embedded systems (cross-compilers, linking, loading, libraries, debugging); programming embedded hardware (memory management, embedded storage, communication interfaces, interrupt service routines, device drivers); embedded operating environments (bootloading, file systems, kernels, pre-emptibility, real-time constraints); and embedded software design/development (hierarchical state machines, modularity, performance analysis, code optimization). The course will provide extensive hands-on experience using real embedded systems and the freely available open source software tools that run on these systems. The goal, however, is to develop an understanding of concepts and methods that will be useful for developing high-quality embedded software regardless of the specific tools that may be adopted for a given project. Prerequisite: C language programming.

*ECE 504  RANDOM PROCESS THEORY FOR ENGINEERS (3)
SEC. 001  (Video Recorded) CANCELLED
TIME: Wednesday & Friday 10:00 – 11:15 E112
PROFESSOR: Dr. L. Montgomery Smith
Probability and random signals as approached by set theory. Random variables: expected values and transformations of random variables. Random processes: stationarity, correlation functions, temporal analysis, and frequency analysis using power spectral densities. The material to be covered in the text is Chapters 1-9.

ECE 556  WIRELESS SENSOR NETWORKS (3)
SEC. 002
TIME: Tuesday & Friday 10:45 – 12:00 F252
PROFESSOR: Dr. Bruce Bomar
Principles and design approaches of wireless sensor networks. Topics include operating systems and programming languages, physical network properties, Media Access Control protocols, geographical routing, data aggregation, real-time communication, query processing, power management, sensing coverage, and applications.

ECE 599  SPECIAL TOPICS: EMBEDDED SYSTEMS SOFTWARE DEVELOPMENT (3)
SEC. 008  (Cross-listed as CS 594 Section 007)
TIME: Tuesday & Friday 1:00 – 2:15 E211
TEXT: TBD
PROFESSOR: Dr. Bruce Whitehead
This course aims to provide the knowledge, software tools, and hands-on experience necessary to develop efficient software for embedded systems. Topics include compiling software for embedded systems (cross-compilers, linking, loading, libraries, debugging); programming
embedded hardware (memory management, embedded storage, communication interfaces, interrupt service routines, device drivers); embedded operating environments (bootloading, file systems, kernels, preemptibility, real-time constraints); and embedded software design/development (hierarchical state machines, modularity, performance analysis, code optimization). The course will provide extensive hands-on experience using real embedded systems and the freely available open source software tools that run on these systems. The goal, however, is to develop an understanding of concepts and methods that will be useful for developing high-quality embedded software regardless of the specific tools that may be adopted for a given project.  Prerequisite: C language programming.

*ECE  599    SPECIAL TOPICS: MULTIDIMENSIONAL DIGITAL SIGNAL PROCESSING (3)    CANCELLED
SEC.  009
TIME: Tuesday & Friday  9:15 -10:30  F252
PROFESSOR:  Dr. L. Montgomery Smith

Advanced topics in multidimensional signal processing with special emphasis on 2-D filter design and implementation techniques. Topics to be covered include: (a) Multidimensional Signals and Systems: concepts of linearity, shift-invariance, periodicity, frequency spectra, and sampling; (b) Computation of the 2-D Discrete Fourier Transform: row-column decomposition methods and higher-radix FFTs; (c) Design and Implementation of 2-D FIR Filters: windowing, McClellan transformation, and weighted least-squares methods; and (d) Design and Implementation of 2-D Recursive (IIR) Filters: the 2-D $z$-Transform, stability criteria, canonical forms, state-space realizations, numerical design techniques. Grade will be based upon homework problems and computer projects. Prerequisite: Consent of instructor required.

TIME: Tuesday & Friday  2:30 – 3:45  B112
TEXT: Class Notes
PROFESSOR: Dr. T. H. Moulden

First order equations. The matrix eigenvalue problem and systems of first order linear equations. Solution in series, Laplace transforms and Green’s functions.

*MATH 435 PARTIAL DIFFERENTIAL EQUATIONS (3) CANCELLED
SEC.  002
TIME: Monday & Thursday  9:15 – 10:30  B210
PROFESSOR: Dr. Kenneth Kimble

Separation of variables, Fourier series, solution of Laplace, wave and heat equations. Prerequisite: Differential Equations and Calculus III.

MATH 453 MATRIX ALGEBRA II (3)
SEC.  002 Videotaped from UTSI
TIME: Monday & Wednesday  8:45 – 9:30  E113
PROFESSOR: Dr. Trevor Moulden

Advanced topics in matrix theory including Jordan canonical form. Prerequisite(s): 251 or 257.

MATH 472 NUMERICAL LINEAR ALGEBRA (3)
SEC.  001 Videotaped from UTSI (Same as CS 472)
TIME: Monday & Wednesday  2:30 – 3:45  E112
PROFESSOR: Dr. Trevor Moulden

Direct and iterative methods for systems of linear equations. Solution of single nonlinear equations and nonlinear systems. Orthogonal decomposition, least squares and algebraic
eigenvalue problem. **Prerequisite:** Numerical Algorithms 1 or consent of instructor. **Recommended prerequisite:** 453.

**MATH 500**  MASTER’S THESIS (1 - 15)
SEC. 002  Dr. Boris Kupershmidt

**MATH 518**  MATHEMATICAL METHODS IN PHYSICS (3) **CANCELLED**
SEC. 001  (Same as Physics 572)
TIME: Monday & Thursday  1:00 – 2:15  B210
ISBN# 0-12-059825-6
PROFESSOR:  Dr. Boris Kupershmidt

Linear vector spaces, matrices, tensors, curvilinear coordinates, functions of a complex variable, partial differential equations and boundary value problems, Green’s functions, integral transforms, integral equations, spherical harmonics, Bessel functions, calculus of variations. **Prereq:** Advanced calculus and differential equations. Must be taken in sequence.  *(Same as Physics 571-572).*

**MATH 519**  SEMINAR IN APPLIED MATHEMATICS (1-3)
SEC. 002
TEXT: Notes provided by Instructor
TIME: Monday  10:15 – 11:30  E112
Thursday  TBD  TBD
PROFESSOR:  Dr. Boris Kupershmidt

**Repeatability:**  May be repeated. **Maximum 12 hours.**

**MATH 578**  NUMERICAL METHODS FOR PARTIAL DIFFERENTIAL EQUATIONS (3) **CANCELLED**
SEC. 001
TIME: Monday & Thursday  1:00 – 2:15  F252
TEXT: TBD
PROFESSOR:  Dr. Christian Parigger

Numerical approximation of solutions of partial differential equations including conservation laws and hyperbolic, parabolic, and elliptic problems. Derivation, physical meaning, and implementation of schemes. **Recommended Background:**  A course in partial differential equations or 512 or 515, and familiarity with an operating system and a programming language.

**MATH 593**  INDEPENDENT STUDY (1-12)
SEC. 004  Dr. Boris Kupershmidt

**MECHANICAL ENGINEERING**

**ME 500**  MASTER’S THESIS (1 - 15)
SEC. 001  Schulz
  021  Antar
  022  Flandro
  023  Majdalani

Solution of nonlinear problems in solid and fluid mechanics and dynamics by use of asymptotic perturbation techniques. Asymptotic expansions, regular and singular perturbations and applications in dynamics, celestial mechanics, potential, viscous and compressible flows. Uniformly valid approximations in various physical problems. Generalized boundary-layer techniques. Coordinate straining techniques; Poincaré’s method. Matched asymptotic expansions and multiple scales. Problems with several time or length scales. Examples taken from various fields of science. Registration Permission: Consent of Instructor.

ME 542 FLUID MECHANICS II (3)
SEC. 001 (Same as AE 542/ES 542)
TIME: Tuesday & Friday 9:15 – 10:30 E211
2. R.L. Panton: Incompressible Flow; Wiley Interscience; Latest publications
PROFESSOR: Dr. Basil Antar

Inviscid flow, boundary layers, laminar jets, wakes and shear layers. Transition to turbulence. Turbulent flow, Reynolds averaged equations, dynamics of turbulence, boundary free turbulent shear flow, turbulent channel’s pipe flow, turbulent boundary layers.

ME 551 AEROSPACE MECHANICS (3)
SEC. 001 (Same as AE 551)
TIME: Tuesday & Friday 7:45 – 9:00 E211
TEXT: Class Notes
PROFESSOR: Dr. Gary Flandro

Principles of mechanics applicable to aerospace vehicles, equations of motion, multibody problems and trajectory analysis. Mission analysis, Lagrangian and Hamiltonian formulations, rotating coordinate systems, orbital operations, advanced deep-space propulsion techniques including solar sailing, gravity assist, and tether propulsion. Prerequisite(s): Mathematics 471.

*ME 552 MECHANICAL DESIGN (3) CANCELLED
SEC. 001
TIME: Tuesday & Friday 7:45 – 9:00 E210
PROFESSOR: TBD

This course concentrates on the background and application of stress analysis in the design of mechanical systems. Topics will include: fundamental principles of stress and factors of safety in design, linear elastic fracture mechanics, and design of shafting, connections, springs, bearings, etc. The design principles will be presented and attention will focus on the limitations imposed by the assumptions.

ME 582 ROCKET PROPULSION II (3)
SEC. 001
TIME: Monday & Thursday 10:45 – 12:00 E211
TEXT: Physics of Electric Propulsion; Robert Jahn (available on amazon.com).
Solid propellant rocket performance, homogeneous and heterogeneous propellant chemistry and combustion system performance, thermal decomposition and gas phase reaction models; effect of chamber pressure and additives on solid propellant burn rates, erosive burning; analysis of two-phase solid rocket exhaust flow. Introduction to nuclear and electric propulsion; electrical resistance and electric field (ion) engine performance, magnetohydrodynamic thrusters, traveling wave thrusters; exotic propulsion systems.

ME 585 TURBOMACHINERY SYSTEMS II (3)
SEC. 001 (Video Recorded)
TIME: Tuesday & Thursday 4:00 – 5:15 E112

The course will provide an in-depth analysis of component performance for compressors, turbines, nozzles, inlets, combustors. Compressor and turbine analysis will include: the Euler turbomachinery equation, velocity triangles, degree of reaction, blade performance and efficiency, and stage loading. Axial and centrifugal turbomachines will be analyzed. Combustors and augmenter performance will be studied. Inlet and nozzle performance will be analyzed and their integration with the full gas turbine engine will be studied. The course will emphasize the use of numerical simulations as tools for use in analyzing gas turbine engine/component performance.

*ME 587 DYNAMIC MODELING AND SIMULATION (3) CANCELLED
SEC. 001
TIME: Tuesday & Friday 2:30 – 3:45 E210
TEXT: Instructor Notes

Theoretical models for a variety of engineering systems are developed from first principles and analyzed using both analytical and numerical methods. Generalized solutions are studied to determine system responses and failure modes. Emphasis is placed on developing good engineering models involving first and second order differential equations, systems of equations, partial differential equations and finite differencing. Systems applications involve mechanical, electrical and aero-thermal engineering fundamentals.

ME 590 SELECTED ENGINEERING PROBLEMS (2-6)
SEC. 001 Dr. Montgomery Smith

ME 595 SEMINARS: AEROSPACE & MECHANICAL SYSTEMS (1)
SEC. 001 Dr. Ahmad Vakili (Same as AE 595)

Seminars in all phases of Mechanical Engineering, reports on current research at UTK and UTSI. May be repeated.

ME 599 SPECIAL TOPICS IN ME: HYBRID ROCKET PROPULSION (3)
SEC. 001
This course reviews the fundamentals of hybrid rocket propulsion with special emphasis on application-based design and system integration, propellant selection, flow and regression rate modeling, solid fuel pyrolysis, scaling effects, transient behavior, and combustion instability. Advantages and disadvantages of both conventional and swirl-driven vortex hybrid configurations are examined. Course includes testing of laboratory-scale hybrid rockets. 

*Prerequisite: Mechanical Engineering 581, or instructor’s consent.*

**ME 599 SPECIAL TOPICS IN ME: PLASMA RADIATION (3)**

**SEC. 003**

**TIME:** Tuesday & Friday 1:00 – 2:15  
**F252**

**PROFESSOR:** Dr. Trevor Moeller

**ME 600 DOCTORAL and RESEARCH DISSERTATION (3-15)**

**SEC. 001 Schulz**  
016 Antar  
017 Majdalani  
018 Flandro  
019 Vakili  
021 Steinhoff  
022 Moeller

**ME 651 ADVANCED TOPICS IN COMPUTATIONAL FLUID DYNAMICS (3)**

**SEC. 001 (Same as AE 661/ES 651)**

**TIME:** Tuesday & Friday 10:45 – 12:00  
**E210**

**TEXT:** TBD

**PROFESSOR:** Dr. John Steinhoff

**PHYSICS**

**PHYS 500 MASTER’S THESIS (1-15)**

**SEC. 002 Crater**  
003 Lewis  
004 Davis  
005 Parigger  
006 Chen
PHYS 503 PHYSICS COLLOQUIUM (1)
SEC. 002
TIME: Thursday 3:30 – 5:00 H-111
PROFESSOR: Dr. Horace Crater

Lectures and discussion on current research topics. Continuous registration required for current graduate students.

*PHYS 507 CONTEMPORARY OPTICS (3) CANCELLED
SEC. 002
TIME: Monday & Thursday 10:45 – 12:00 CLA Conference Room
PROFESSOR: Dr. Lloyd Davis

Topics in geometrical, physical, Fourier, and nonlinear optics and introductory laser physics. Extensive use of computer calculations and design of practical and sophisticated optical systems.

*PHYS 514 PROBLEMS IN THEORETICAL PHYSICS II (4) CANCELLED
SEC. 002 (Interactive Transmission from Knoxville)
TIME: Wednesday 10:15 – 11:15 E113
TEXT: Core Concepts in Physics
PROFESSOR: Dr. Marianne Breinig

A course in Calculus based physics with 135, satisfies prerequisite for 200 level and beyond. Alternative to honors Physics 137–138 for physics majors. 3 hours lecture, 2 hours lab. Coreq: Mathematics 141-142.

PHYS 522 QUANTUM MECHANICS (3)
SEC. 002 (Videotaped at UTSI)
TIME: Monday & Thursday 8:45 – 10:00 E112
TEXT: Sakurai: Quantum Mechanics; Addison Wesley
PROFESSOR: Dr. Horace Crater

Fundamental principles of quantum mechanics, free particle, harmonic oscillator, hydrogenation, angular momentum, electron spins, particles in electric and magnetic fields, perturbation theory, variational methods, scattering theory. Application of quantum mechanics to problems of atomic, molecular, nuclear, and solid state physics. Prerequisite: Physics 521.

PHYS 541 ELECTROMAGNETIC THEORY (3)
SEC. 002
TIME: Monday & Thursday 10:45 – 12:00 F252
PROFESSOR: Dr. Christian Parigger

Review of electrostatics, magnetostatics, and quasi-static problems; Maxwell’s field equations and their solutions in dielectric and conducting media; electrodynamics and relativity retarded potentials and gauge transformations, radiation produced by accelerating charges.

*PHYS 572 MATHEMATICAL METHODS IN PHYSICS (3) CANCELLED
SEC. 001 (Same as Math 518)
Linear vector spaces, matrices, tensors, curvilinear coordinates, functions of a complex variable, partial differential equations and boundary value problems, Green’s functions, integral transforms, integral equations, spherical harmonics, Bessel functions, calculus of variations. Prerequisite: Advanced calculus and differential equations. Must be taken in sequence.

*PHYS 573  NUMERICAL METHODS IN PHYSICS (3) CANCELLED
SEC. 002
TIME: Tuesday & Friday  2:30 – 3:45  E211
PROFESSOR:  Dr. Christian Parigger

Numerical methods for solution of physical problems, use of digital computers, analysis of errors. Prerequisite: 571 or consent of instructor.

COMMENT:  This is a course recognized for the new interdisciplinary graduate minor program in computational science: http://igmcs.utk.edu.

PHYS 599  SEMINAR IN MODERN PHYSICS: SINGLE-MOLECULE SPECTROSCOPY (3)
SEC. 006
TIME: Tuesday & Friday  10:45 – 12:00  F253
TEXT: TBD
PROFESSOR:  Dr. Lloyd Davis

Seminar discussions on assigned readings from the literature on single-molecule spectroscopy.

PHYS 599  SEMINAR IN MODERN PHYSICS: OCULAR SCIENCE AND INSTRUMENTATION (3)
SEC. 007
TIME: Monday & Thursday  9:15 – 10:30  F253
TEXT: TBD
PROFESSOR:  Dr. Ying Ling Ann Chen

Repeatability:  May be repeated with consent of department. Maximum 18 hours.

PHYS 600  DOCTORAL & RESEARCH DISSERTATION (3 - 15)
SEC. 002  Crater
003  Lewis
004  Davis
005  Parigger
006  Chen
*PHYS 611  ADVANCED QUANTUM MECHANICS AND FIELD THEORY (3) CANCELLED
SEC.  001
TEXT: Advanced books on Quantum Mechanics including Schwabl; Advanced Quantum Mechanics, Third Edition; Springer 2005; Schwabl, Quantum Mechanics, 4th edition, Springer 2007 and classic references such as Bransden and Joachain; Physics of Atoms and Molecules; Benjamin Cummings; 2003 (2nd Edition); and/or Sakurai and Cohen Tannoudji, and on-line references, including references to Quantum Electrodynamics.
TIME: Monday & Thursday  9:15 –10:30  E211
PROFESSOR:  Dr. Christian Parigger

Survey of problems and methods. Topics of current interest. Comment(s): Intended for all graduate students.

*PHYS 627  ELEMENTARY PARTICLE PHYSICS (3) CANCELLED
SEC.  001
TEXT: TBD
TIME: Monday & Thursday  1:00 – 2:15  B112
PROFESSOR:  Dr. Horace Crater

Advanced topics – quark models, electroweak interactions, and unification of elementary forces. (Comment(s): Intended for students specializing in the field).

*PHYS  671  ADVANCED SOLID STATE PHYSICS (3) CANCELLED
SEC.  002
TEXT: Electrical Transport in Nanoscale Systems; Massimiliano Di Ventra; Cambridge 2008; and classic Solid State Physics references, e.g. Kittel, Solid State Physics, 8th ed, Wiley 2005, including references to sections of Greiner, Quantum Electrodynamics, Springer 2003, and on-line references.
TIME: Tuesday & Friday  10:45 – 12:00  E211
PROFESSOR:  Dr. Christian Parigger

Survey of research problems and methods. Topics of current interest. Comment(s): Intended for all graduate students.
