REGISTRATION ANNOUNCEMENT
FALL SEMESTER 2018

REGISTRATION PROCEDURE

GRADUATE ACADEMIC ADVISING

Graduate students should contact your departmental faculty to arrange an advising appointment. If you’re not accepted into a specific program, the assistant to the dean of graduate studies or the designee may act as your advisor. When the web registration system asks if you’ve discussed your program with your advisor, you must answer yes to continue with the registration process.

REGISTRATION

Students will register at http://my.utk.edu. You will need to log in using your NetID and your NetID password. If you do not know your NetID and NetID password, go to http://onestop.utk.edu/your-classes/registering-for-classes/.

*Log in to MyUTK. You can find a link by looking under “M” on the A-Z index (http://www.utk.edu/alpha/) or by typing myutk.utk.edu directly into your browser. You will need to log in by typing utk/your NetID in the “username” field and then your NetID password in the “password” field.

*Before you attempt to register, clear and pay any financial holds (parking tickets, library fines, fees, etc.).

*Look under the “For Your Review” heading on the MyUTK portal page (located in the upper right-hand corner) for notification of any holds you may have.

*Once you are logged into “My UTK,” scroll down to “UTK Student Registration Links.” Click on “Search for Classes” to look up sections and then register.

*Print a copy of your schedule when you are finished registering.

If you have any questions, call the Office of the University Registrar at 865-974-2101 or contact Charlene Hane in Student Services room D-100, phone 931-393-7228, email chane@utsi.edu.

TOLL-FREE NUMBERS

For a specific office: ................................................. 1-888-822-UTSI (8874) and the extension number.
For general information: ................................................................. 1-888-822-UTSI (8874)
Admissions Office: ................................................................. 1-888-822-UTSI (8874)-37234
Budget and Finance Office: .......................................................... 1-888-822-UTSI (8874)-37297
Student Services................................................................. 1-888-822-UTSI (8874)-37228

APPLICATION FOR ADMISSION

No student will be allowed to register unless a completed Application to the Graduate School of the University of Tennessee, Knoxville (UTK) is on file in the Registrar's Office. An Application for Admission to the UTK Graduate School must be completed online at https://www.applyweb.com/utg and accompanied by a $60.00 non-refundable application fee made payable to The University of Tennessee Space Institute. All applicants are required to provide one official transcript of all undergraduate and graduate records, GRE test scores and
three letters of recommendation when applying. International applicants will also need to include TOEFL scores. GRE scores are a requirement of all departments at UTSI except the Master of Science degree in Industrial Engineering/Engineering Management concentration. Please select UT Space Institute if you plan to attend the Tullahoma campus location. All applications need to be submitted online to the office of Graduate Admissions Knoxville, TN.

Graduate Research Assistantship applications need to be submitted to Clara Ferguson, Office of Admissions and Recruiting, University of Tennessee Space Institute, MS-6, Tullahoma, TN 37388-9700. Assistantship applications must include GRE test scores and three letters of recommendation. All International applicants will need to provide TOEFL test scores in addition to GRE’s. Official transcripts and test scores should be sent to College Code 1843, Graduate Admissions Office, 201 Student Services Building, Knoxville, TN 37996-0221. Once admitted, a full admission will not be granted until all official test scores and degree confirmation are received in the Graduate Admissions Office in Knoxville. Please contact Clara Ferguson at (931) 393-7234 or 888-822-8874 ext. 37234 if you have questions.

**TOTAL WITHDRAWAL FROM THE UNIVERSITY**

If, after registering for classes and either returning your fee payment or your Confirmation of Attendance form to the Bursar’s Office, you decide not to enroll for this term, you must immediately notify Charlene Hane, Student Services, at UTSI. If you withdraw officially on or before a Change of Registration deadline, but after the no “W” deadline for a particular session, the grade of “W” will be issued.

**GRADES**

Students may obtain their grades through the web at MyUTK or contact Charlene Hane, Student Services, Office D-100, (931) 393-7228.

**GRADUATE STUDENTS CHANGE OF REGISTRATION AFTER THE DEADLINE**

To change registration in any way after the deadline, a graduate student must present a request, signed by the instructor(s) and adviser as evidence of their knowledge of the request to Charlene Hane, Student Services at UTSI. Graduate students must verify that ALL changes have been approved by their academic adviser. If the Office of Graduate Student Services approves the change of registration, the change will be noted on the student’s permanent record. THE DROP DEADLINE FOR GRADES AND THE DROP DEADLINE FOR FEE REFUNDS ARE NOT THE SAME.

**FULL-TIME STUDENTS**

Students enrolled in at least 9 semester hours during the Fall/Spring/Summer semesters are considered full-time. Full-time enrollment for two consecutive semesters is required to full fill the admission to candidacy doctoral degree residency requirement. Graduate Research Assistants (GRAs) must be enrolled for 9 hours during the Fall/Spring semesters and 6 hours during the Summer. GRAs must also enroll in one of the MABE 595 seminars or a PHYS 599 seminar each semester in which seminars are offered, unless a waiver is granted by the Associate Executive Director.

**REMOVAL OF INCOMPLETE GRADES**

All Incomplete Grades (I) must be removed prior to graduation. The instructor, in consultation with the student, decides the terms for the removal of the I, including the time limit for removal. If the I is not removed within one calendar year, the grade will be changed to an F. The course
will not be counted in the cumulative grade point average until a final grade is assigned. No student may graduate with an I on the record. Students planning to graduate Fall Semester 2018 must remove all INCOMPLETE GRADES by December 4, 2018. Contact Charlene Hane, Student Services, to remove an Incomplete Grade.

REPEATING A COURSE

No graduate student may repeat a course for the purpose of raising a grade already received, with the exception of a NC course. A graduate student cannot do additional work nor repeat an examination to raise a final grade.

ADMISSION TO CANDIDACY

MASTER OF SCIENCE DEGREE:

Each M.S. student, including IE Capstone Project students, is responsible for submitting a completed and signed Admission to Candidacy Application at least one semester prior to receiving the degree.

Candidacy committee changes or course changes must be submitted to the committee chairman using a Revision form. If changing from a thesis option to a non-thesis option or vice versa, a new Admission to Candidacy Application must be submitted. All forms must be processed through Student Services.

DOCTORAL DEGREE:

A Doctoral Committee should be formed during the student's first year of doctoral study. Any changes to the doctoral committee (deletions or additions) must be submitted to the Committee Chairman using a Revision form for approval. Each doctoral student is responsible for submitting a completed Admission to Candidacy form signed by the doctoral committee at least one semester prior to receiving the degree. All forms must be processed through Student Services.

CONTINUOUS ENROLLMENT

All degree-seeking graduate students are expected to make a full commitment to their graduate and professional study in order to ensure that they can complete all degree requirements without unnecessary delay. Graduate students are therefore required to maintain an active status through continuous enrollment from the time of first enrollment until graduation.

Continuous enrollment is maintained by registering for a minimum of one graduate credit hour per semester (excluding the summer, unless stipulated otherwise by the program or department). However, students who have started taking dissertation hours (course 600) must maintain a minimum of three credit hours per semester during all semesters, including the summer, as stipulated in the policy on "Registration for Course 600 (Doctoral Research and Dissertation)" in order to comply with the Continuous Enrollment requirement (see under Doctoral Programs for details).

The minimum enrollment for international students may be different, and international students always need to check with the Center for International Education (CIE) in order to determine what minimum enrollment they need to maintain in order to satisfy all enrollment requirements attached to their specific visa.
CONSEQUENCES OF NON-ENROLLMENT WITHOUT LEAVE OF ABSENCE

Graduate students who do not maintain continuous enrollment as stipulated in the "Continuous Enrollment" policy will lose their active student status. A student who has lost his or her active status without having been granted a Leave of Absence for the period of non-enrollment ahead of time will not be allowed to continue in his/her graduate program until readmitted. (see policy on "Readmission" in the Graduate Catalog for more details).

Non-enrollment other than during an approved Leave of Absence (LOA) does not alter or affect any of the milestone deadlines, such as admission to candidacy, time to degree, etc.

Upon approval for readmission to complete the interrupted degree program, students will be retroactively enrolled in every semester of missed enrollment for one graduate credit hour of Course 502 or for three graduate credit hours of Course 600 (whichever is appropriate). Students will be responsible for paying the past tuition charges and fees as well as the current university per semester late registration penalty. All past due charges will need to be paid before the Graduate School will approve the student for any future enrollment.

FINAL EXAM FOR NON-THESIS, CAPSTONE PROJECT STUDENTS, THESIS AND DISSERTATION STUDENTS

A candidate presenting a thesis or dissertation must pass a final oral examination on all work offered for the degree. The examination is scheduled through Student Services. Failure to notify Student Services of the examination date will put the student at risk for graduating that semester. Final examinations not properly scheduled MUST be repeated. The final draft of the thesis must be distributed to the committee members at least two weeks prior to the date of the final examination. In case of a grade of "Fail", the candidate may not apply for re-examination until the following semester. The result of the second examination is final.

UT POLICY ON INSURANCE FOR INTERNATIONAL STUDENTS

All foreign national students registered with the University of Tennessee, Knoxville, are required to have comprehensive medical insurance. The policy for the 2017-2018 academic year is provided by United HealthCare Student Resources. The premium must be paid before registration. Contact the Student Services Office (room D-100 ext. 37228) for further information.

GENERAL SEMINAR

A number of seminars of interest to all UTSI students and general public will be offered throughout the semester.

FINAL EXAM DATES

Study Day – December 5, 2018
Final Exams – December 6, 7, & 10, 2018

FINANCIAL CALENDAR, FEES, REFUNDS, AND TUITION

Please click http://onestop.utk.edu/tuition-fees/ link to the most current information. You may also contact Jennifer Boyles in the Business and Finance Office at jboyles@utsi.edu or phone number 931-393-7297.
The UTSI Budget and Finance Accounts Receivable Office will no longer accept payment for tuition and fees by credit card. All students will need to login to MyUTK One Stop to make secure payments online.

Please see One Stop - Paying Tuition and Fees webpage for more details http://onestop.utk.edu/pay/.

Credit or Debit Cards

There is a 2.75% service fee for these payments. UT has a contract with an outside vendor to provide this service. The vendor retains the fee in full.

HONOR STATEMENT

The following Honor Statement is signed by all students applying to The Graduate School:

"An essential feature of The University of Tennessee, Knoxville is a commitment to maintaining an atmosphere of intellectual integrity and academic honesty. As a student of the University, I pledge that I will neither knowingly give nor receive any inappropriate assistance in academic work, thus affirming my own personal commitment to honor and integrity."

For official information on all UTK Graduate School policies, refer to the current UTK Graduate Catalog available at http://catalog.utk.edu. The student handbook “Hilltopics” is available online at https://hilltopics.utk.edu/

The University of Tennessee Space Institute reserves the right to cancel any class with an insufficient number of students, or for other reasons.

THE UNIVERSITY OF TENNESSEE POLICY ON A DRUG-FREE CAMPUS AND WORKPLACE

In support of the Drug-Free Workplace Act of 1988 (Public Law 100-690) and the Drug-Free Schools and communities Act of 1989, the University of Tennessee is notifying all students, faculty, and staff of the following university policy approved by the UT Board of Trustees on 21 June 1990.

It is the policy of the University of Tennessee to maintain a safe and healthful environment for its students and employees. Therefore, university policy prohibits the unlawful use, manufacture, possession, distribution, or dispensing of drugs ("controlled substances" as defined in the Controlled Substances Act, 21 U.S.C. 812) and alcohol on university property or during university activities.

Violation of this policy is grounds for disciplinary action—up to and including immediate discharge for an employee and permanent dismissal of a student. Federal and state laws provide additional penalties for such unlawful activities, including fines and imprisonment (21 U.S.C. 841 et seq.; T.C.A. 39-6-401 et seq.). Local ordinances also provide various penalties for drug- and alcohol-related offenses. The university is bound to take all appropriate actions against violators, which may include referral for legal prosecution or requiring the individual to participate satisfactorily in an approved drug use or alcohol abuse assistance or rehabilitation program.
THE UNIVERSITY RESERVES THE RIGHT TO REVISE ANY INFORMATION LISTED IN THIS TIMETABLE OF CLASSES

The University of Tennessee Space Institute
Fall 2018 Course Listings

AEROSPACE ENGINEERING

AE  500  Master’s Thesis (1-15)
SEC. 001 CRN 42572  Abedi
009 CRN 42588  Balas
010 CRN 42592  Brooks
011 CRN 42594  Moeller
012 CRN 42597  Schmisseur
013 CRN 42598  Solies
014 CRN 42599  Vakili
015 CRN 42602  Zhang

Grading Restriction: P/NP only.
Repeatability: May be repeated.
Credit Level Restriction: Graduate credit only.
Registration Restriction(s): Minimum student level – graduate.

AE  502  Registration for Use of Facilities (1-15)
SEC. 002 CRN 42617  Moeller

Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.
Credit Level Restriction: Graduate credit only.
Registration Restriction(s): Minimum student level – graduate

AE  511  Inviscid Flow (3)
SEC. 002 CRN 45874
TIME: Tuesday & Thursday 1:10 – 2:25 E-110
PROF: Dr. Ahmad Vakili

Kinematics and dynamics of inviscid fluids; potential flow about body, conformal mapping.
(DE) Prerequisite(s): 541 and Mathematics 425.

AE  515  Air Vehicle Aerodynamics and Performance (3)
SEC. 001 CRN 44990
TIME: Tuesday & Friday 11:00 – 12:15 E-111
PROF: Dr. Peter Solies
Application of aerodynamics principles to air vehicles to provide estimates of performance, stability, and control characteristics for subsonic to hypersonic speeds. Relations among thrust, drag, lift and attitude, propulsion systems, vehicle performance characteristics, and trajectory optimization.

AE  517  Finite Elements for Engineering Applications (3)
SEC.  001  CRN  50262  (Same as ME 517 001 CRN 50241)

TEXT: Notes will be provided. Useful books (not required):
ISBN: 9780979004902

TIME: Monday & Wednesday  10:10 – 11:25  E-110
PROF: Dr. Reza Abedi

Modern computational theory applied to conservation principles across the engineering sciences. Weak forms, extremization, boundary conditions, discrete implementation via finite element, finite difference, finite volume methods. Asymptotic error estimates, accuracy, convergence, stability. Linear problem applications in 1, 2 and 3 dimensions, extensions to non-linearity, non-smooth data, unsteady, spectral analysis techniques, coupled equation systems. Computer projects in heat transfer, structural mechanics, mechanical vibrations, fluid mechanics, heat/mass transport.

Cross-listed: (Same as Mechanical Engineering 517)

Comment(s): Bachelor’s degree in engineering or natural science required.
Registration Permission: Consent of instructor.

AE  521  Aerodynamics of Compressible Fluids I (3)
SEC.  001  CRN  45678

TIME: Monday & Wednesday  08:40 – 09:55  E-110
PROF: Dr. John Schmisseur

One-dimensional internal and external flow; waves; small perturbation theory; slender body theory; similarity rules; method of characteristics.

Revision of the course content for AE 521: Aerodynamics of Compressible Fluids I will accelerate and broaden course content to provide a more comprehensive knowledge of compressible fluid dynamics for graduate students who have prior course experience covering compressible flows. Historically, for a non-trivial percentage of students in the course with Mechanical Engineering backgrounds the course has been the students’ first exposure to the theory of compressible flow. With the planned development of an ME599 Gas Dynamics course to provide an appropriate introduction to the material for graduate students, the course content of AE521 can be enhanced to cover a much broader range of material at an accelerated pace.

Topics to be covered in the revised AE521 course include the following:
- A review of normal and oblique shocks and Prandtl Meyer expansions
- A review of Fanno and Rayleigh Flow
- Shock Interactions and Reflections
- A review of nozzle flows
• Unsteady wave motion
• Crocco’s Theorem and the Velocity Potential Equation
• Linearized Flow
• Conical Flow
• Method of Characteristics
• An introduction to Hypersonics / Newtonian Theory if time permits

Recommend pre-requisite compressible flow course.

AE 533 Dynamics (3)
SEC. 002 CRN 46824
TIME: Monday & Wednesday
PROF: Dr. Dustin Crouch

Cross-listed: (Same as Mechanical Engineering 533.)

Recommended Background: 391 or Mathematics 431 and an undergraduate vibrations course.

AE 590 Selected Engineering Problems (2-6)
SEC. 002 CRN 42625  Abedi
003 CRN 42626  Balas
004 CRN 45680  Brooks
005 CRN 45681  Moeller
006 CRN 45682  Schmisseur
007 CRN 45683  Solies
008 CRN 45684  Vakili
009 CRN 45685  Zhang

Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Enrollment limited to students in problems option.
Registration Permission: Consent of advisor.

AE 595 Aerospace Engineering Seminar (1)
SEC. 001 CRN 42629
TEXT: None
TIME: Will be announced through email
PROF: Dr. Trevor Moeller

All phases of aerospace engineering, reports on current research at the University of Tennessee, Knoxville, and UTSI.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 20 hours.

AE 599 Special Topics in AE: The Art and Science of Performing Advanced Experiments on Materials and Biomaterials at Large Facilities (3)
SEC. 001 CRN 42632 (Same as ME 599 001 CRN 43315, BME 001 CRN 42675)
1. Interaction of x-rays with matter;
2. The production and physics of synchrotron and X-ray Free Electron Laser radiation;
3. X-ray optics, beamlines, and instrumentation;
4. X-ray diffraction and scattering;
5. UV and x-ray spectroscopies;
6. X-ray imaging (mainly tomography and lensless imaging/ptychography);
7. Phasing techniques in macromolecular crystallography;
8. General user proposal system.

Repeatability: May be repeated. Maximum 6 hours.

AE 599 Special Topics in Aerospace Engineering: Atmospheric Sciences for AE/ME (3)
SEC. 002 CRN 42633 (Same as ME 599 010 CRN 47776)
TEXT: Atmospheric Science; Wallace and Hobbs; Academic Press; 2nd Edition (February 15, 2006);
TIME: Monday & Thursday 10:00 – 11:15 E-111
PROF: Dr. Steve Brooks

Structure of the atmosphere, energy balance, turbulent boundary layer, satellite drag, aero-maneuvers and de-orbits, and hypersonic flight in the upper atmosphere. These will be extended to the Venusian, Martian and Jovian atmospheres.

AE 599 Special Topics in Aerospace Engineering: Experimental Flight Mechanics: Fixed Wing Stability and Control (3)
SEC. 006 CRN 48627
TEXT: Flight Testing of Fixed Wing Aircraft; Ralph D. Kimberlin; AIAA; First Edition;
ISBN 1-56347-564-2
TIME: Tuesday & Friday 1:00 – 2:15 E-111
PROF: Dr. Peter Solies

Fundamental theories, flight test techniques, and data collection and analyses for fixed wing aircraft performance. Topics: air data system calibration, takeoff and landing performance, turn performance, cruise performance, energy concepts, and aerodynamic modeling. Weekly classroom academics with approximately 4-6 flight labs.
(RE) Prerequisite(s): 503 or Aerospace Engineering 515.
Repeatability: May be repeated. Maximum 6 hours.

AE 599 Special Topics in AE: Micro/Nano Electro Mechanical Systems/Sensors (3)
SEC. 010 CRN 51696 (Same as ME 599 008 CRN 46865, BME 599 005 CRN 48426)
Reference:
Nadim Maluf, An Introduction to Microelectromechanical Systems Engineering, 2nd Edition,
TIME: Tuesday & Thursday 2:40 – 3:55 E-110
The lectures will cover fundamentals and elements of micro/nano-scale design, fabrication, integration, and systems, including lithography, deposition, etching, thin film, surface modification, bonding, and characterization. The videos/movies will be presented to introduce the state-of-the-art fabrication process and integration. Their applications to energy systems, power/propulsion devices, biomedical applications, transducers and actuators will be discussed.

**Repeatability:** May be repeated. Maximum 6 hours.

**AE 600 Doctoral Research/Dissertation (3-15)**

BME 601 Doctoral Research Methodology (3)
SEC. 002 CRN 48909
TEXT: TBD
TIME: TBD
PROF: Dr. Jeffrey Reinbolt

Intensive, individualized experience in reviewing literature, evaluating experimental or theoretical
methods, planning a research project, and presenting research project plans orally and in writing.
Registration Restriction(s): Minimum student level – graduate. PhD students only.
Registration Permission: Consent of instructor.
ENGINEERING MANAGEMENT

EM  500  Master’s Thesis (1-15)
SEC.  001  CRN  47626  Simonton
SEC.  002  CRN  49342  Yu

Restriction: P/NP only.
Repeatability: May be repeated.
Credit Level Restriction: Graduate credit only.
Registration Restriction(s): Minimum student level – graduate.

EM  501  Capstone Project (3-6)
SEC.  001  CRN  42988  Tolk

Application-oriented project to show competence in major academic area.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Requires enrollment in engineering management.
Credit Level Restriction: Graduate credit only.
Registration Restriction(s): Minimum student level – graduate.

EM  502  Registration for Use of Facilities (1-15)
SEC.  001  CRN  42989  Simonton
SEC.  002  CRN  49347  Yu

Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.
Credit Level Restriction: Graduate credit only.
Registration Restriction(s): Minimum student level – graduate.

EM  532  Productivity and Quality Engineering (3)
SEC.  001  CRN  45042  Pre-recorded

TEXT:  Improving Performance: How to Manage the White Space on the Organization Chart; 3rd
Edition; Geary A. Rummler and Alan P. Brache.
Publications, Inc.
Cambridge, MA: The MIT Press.
TIME:  TBD
PROF:  Dr. Janice Tolk

Productivity and quality measures defined and used to analyze current competitive position of important sectors of American industry with respect to national and international competition. Study of management theories and systems which promote or inhibit productivity or quality improvements.

EM  537  Analytical Methods for Engineering Managers (3)
SEC.  001  CRN  45046  UTSI students participating at Tullahoma
SEC.  002  CRN  45047  UTSI students participating elsewhere
Survey of management analysis and control systems through industrial engineering techniques. Qualitative and quantitative systems: methods analysis, work measurement, incentive systems, wage and salary development, production and inventory control, facility layout, linear programming, and applied operations research techniques.  

*Credit Restriction: No credit for student with undergraduate degrees in industrial engineering.*

**EM 539 Strategic Management in Technical Organizations (3)**  
**SEC.**  
001 CRN 45050 UTSI students participating at Tullahoma  
002 CRN 45051 UTSI students participating elsewhere  
003 CRN 45052 UTK students participating elsewhere  
**TIME:** Tuesday 1:00 – 3:30  
**PROF:** Dr. Sandra Affare  

Strategic planning process and strategic management in practice; corporate vision and mission; product, market, organizational, and financial strategies; external factors; commercialization of new technologies; and competition and beyond.  

*Recommended Background: Graduate standing in Engineering or Business.*

**EM 543 Legal and Ethical Aspects of Engineering Management (3)**  
**SEC.**  
001 CRN 51240 UTSI students participating at Tullahoma  
002 CRN 51247 UTSI students participating elsewhere  
003 CRN 51248 UTK students participating elsewhere  
**TIME:** Thursday 1:00 – 3:30  
**PROF:** Dr. Sandra Affare  

Legal aspects imposed by government and ethical considerations in engineering practice. Selected readings, lecture, discussion, and student presentations. Current topics from government and industry.

**EM 600 Doctoral Research/Dissertation (3-15)**  
**SEC.**  
001 CRN 45056 Simonton  
002 CRN 45058 Yu  

*Grading Restriction: P/NP only.*  
*Repeatability: May be repeated.*  
*Registration Restriction(s): Minimum student level – graduate.*

**EM 602 Supply Chain and Logistics Systems Engineering (3)**  
**SEC.**  
001 CRN 52347 UTSI students participating at Tullahoma  
002 CRN 52348 UTSI students participating elsewhere  
003 CRN 52349 UTK students participating elsewhere  
**TEXT:** Instructor will provide electronic files through Canvas
This course introduces the concepts, methods and techniques of supply chain management and logistics support from a systems engineering perspective. The discussion of different topics in the course will focus on the different stages in a system life cycle.

(RE) Prerequisite(s): 537

INDUSTRIAL ENGINEERING

IE 529 Applications of Linear Algebra in Engineering Systems (3)
SEC. 002 CRN 46718 (Video Recorded)
TIME: Tuesday & Friday 9:30 – 10:45 E-111

ME  511  Fundamentals of Heat Conduction (3)
SEC.  001  CRN  45263  (Live connection – not recorded)
TEXT: TBD
TIME: Tuesday & Thursday 10:10 – 11:25 E-110
PROF: Dr. Jay Frankel

Physical and mathematical formulations for Fourier heat conduction problems for lumped systems,
transient and steady-state distributed systems. Solutions by separation of variables, generalized integral
transforms (Fourier and Laplace) for finite and infinite domains, Green’s function method, and
perturbation methods for nonlinear systems.
Recommended Background: Undergraduate heat transfer course.

ME  517  Finite Elements for Engineering Applications (3)
SEC.  001  CRN  50241  (Same as AE 517 001 CRN 50262)
TEXT: Notes will be provided. Useful books (not required):
Zienkiewicz, Olek C., and Robert L. Taylor. The finite element method for solid and structural
mechanics. Elsevier, 2005
ISBN: 9780979004902
T. J. R. Hughes; The Finite Element Method: Linear Static and Dynamic Finite Element
TIME: Monday & Wednesday 10:10 – 11:25 E-110
PROF: Dr. Reza Abedi

Modern computational theory applied to conservation principles across the engineering sciences. Weak
forms, extremization, boundary conditions, discrete implementation via finite element, finite difference,
finitie volume methods. Asymptotic error estimates, accuracy, convergence, stability. Linear problem
applications in 1, 2 and 3 dimensions, extensions to non-linearity, non-smooth data, unsteady, spectral
analysis techniques, coupled equation systems. Computer projects in heat transfer, structural mechanics,
mechanical vibrations, fluid mechanics, heat/mass transport.
Cross-listed: (Same as Aerospace Engineering 517.)
Comment(s): Bachelor’s degree in engineering or natural science required.
Registration Permission: Consent of instructor.

ME  524  Fracture Mechanics (3)
SEC.  001  CRN  48650
USA, 2004 (main textbook).
TIME: Monday & Wednesday 11:40 – 12:55 E-110
PROF: Dr. Reza Abedi
Mechanisms of fracture and crack growth; stress analysis; crack tip plastic zone; energy principles in fracture mechanics; fatigue-crack initiation and propagation; fracture mechanic design and fatigue life prediction. Analytical, numerical, and experimental methods for determination of stress intensity factors. Current topics in fracture mechanics.

Registration Permission: Consent of instructor.

ME 525 Combustion of Chemically Reacting Flow I (3)
SEC. 001 CRN 50217
TIME: Monday & Wednesday 1:00 – 2:15 E-113
PROF: Dr. Trevor Moeller

Fundamentals: thermochemistry, chemical kinetics and conservation equations; phenomenological approach to laminar flames; diffusion and premixed flame theory; single droplet combustion; deflagration and detonation theory; stabilization of combustion waves in laminar streams; flammability limits of premixed laminar flames; introduction to turbulent flames.

(DE) Prerequisite(s): 522 and 541 or consent of instructor.

ME 529 Applications of Linear Algebra in Engineering Systems (3)
SEC. 002 CRN 46720 (Video Recorded)
TIME: Tuesday & Friday 9:30 – 10:45 E-111
PROF: Dr. Monty Smith

Fundamental concepts of linear algebra to problems in engineering systems: steady state and dynamic systems. Geometric and physical interpretations of relevant concepts: least square problems, LU, QR, and SVD decompositions of system matrix, eigenvalue problems, and similarity transformations in solving difference and differential equations; numerical stability aspects of various algorithms; application of linear algebra concepts in control and optimization studies; introduction to linear programming. Computer projects.

Cross-listed: (Same as Chemical and Biomolecular Engineering 529; Civil Engineering 529, Electrical and Computer Engineering 529; Environmental Engineering 529; Industrial Engineering 529; Materials Science and Engineering 529; Nuclear Engineering 529).

Comment(s): Graduate standing or consent of instructor required.

ME 533 Dynamics (3)
SEC. 002 CRN 46825
TIME: Monday & Wednesday 1:10 – 2:25 E-110
PROF: Dr. Dustin Crouch

Cross-listed: (Same as Mechanical Engineering 533.)
Recommended Background: 391 or Mathematics 431 and an undergraduate vibrations course.

ME 560 Introduction to Nanomanufacturing (3)
SEC. 002 CRN 52497
TEXT: TBD
TIME: Tuesday & Thursday 8:40 – 9:55 E-110
PROF: Dr. Anming Hu

Fundamentals of nanotechnology and nano fabrication, experimental methods of nano science and technology, advanced manufacturing overview, additive manufacturing (3D printing), electromechanical device fabrications, printable sensors and energy devices, biomedical printing. Recommended Background: Engineering Mechanics (ME202), Introduction to Materials Science and Engineering (MSE201), Introduction to Chemical Research (CHEM 200).

ME 584 Turbomachinery Systems I (3)
SEC. 001 CRN 45272
TIME: Monday & Wednesday 2:40 –3:55 E-110
PROF: Dr. Milt Davis

Ideal cycle analysis of turbine engines, real cycle analysis, component performance analysis, component design and systems integration (inlets, nozzles, combustors, compressors, turbines), flowthrough theory, turbine engine component matching, transient operation, surge and rotating stall, engine control systems, structural considerations.
Comment(s): First-year graduate standing required.
Registration Permission: Consent of instructor

ME 590 Selected Engineering Problems (2-6)
SEC. 001 CRN 43311 Abedi
002 CRN 43312 Balas
003 CRN 45278 Brooks
004 CRN 45704 Moeller
005 CRN 45705 Schmisseur
006 CRN 45706 Solies
007 CRN 45707 Vakili
008 CRN 45708 Zhang

Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Enrollment limited to students in problems option.
Registration Permission: Consent of advisor.

ME 595 Mechanical Engineering Seminar (1)
SEC. 001 CRN 43313
TEXT: None
TIME: Will be announced through email  
PROF: Dr. Trevor Moeller

All phases of mechanical engineering, reports on current research at the University of Tennessee, Knoxville, and the University of Tennessee Space Institute.  
Grading Restriction: Satisfactory/No Credit grading only.  
Repeatability: May be repeated. Maximum 20 hours.

ME 599 Special Topics in ME: The Art and Science of Performing Advanced Experiments on Materials and Biomaterials at Large Facilities (3)  
SEC. 001 CRN 43315 (Same as AE 599 001 CRN 42632, BME 001 CRN 42675)  
TIME: Tuesday & Thursday 11:25 – 12:40 Zoom  
PROF: Dr. Jacqueline Johnson

1. Interaction of x-rays with matter;  
2. The production and physics of synchrotron and X-ray Free Electron Laser radiation;  
3. X-ray optics, beamlines, and instrumentation;  
4. X-ray diffraction and scattering;  
5. UV and x-ray spectroscopies;  
6. X-ray imaging (mainly tomography and lensless imaging/ptychography);  
7. Phasing techniques in macromolecular crystallography;  
8. General user proposal system.  
Repeatability: May be repeated. Maximum 6 hours.

ME 599 Special Topics in ME: Micro/Nano Electro Mechanical Systems/Sensors (3)  
SEC. 008 CRN 46865 (Same as AE 599 010 CRN 51696, BME 599 005 CRN 48426)  
Reference:  
TIME: Tuesday & Thursday 2:40 – 3:55 E-110  
PROF: Dr. Feng-Yuan Zhang

The lectures will cover fundamentals and elements of micro/nano-scale design, fabrication, integration, and systems, including lithography, deposition, etching, thin film, surface modification, bonding, and characterization. The videos/movies will be presented to introduce the state-of-the-art fabrication process and integration. Their applications to energy systems, power/propulsion devices, biomedical applications, transducers and actuators will be discussed.  
Repeatability: May be repeated. Maximum 6 hours.

ME 599 Special Topics: Fundamentals of Gas Dynamics as Applied to Propulsion Systems (3)  
SEC. 009 CRN 47676  
In this course, the student will be introduced to the fundamentals of gas dynamics. Specific topics in the course will cover varying area flow, normal and oblique shocks, expansions, duct friction and heat transfer. A wide variety of practical engineering problems can be solved with these concepts and many of these problems will be highlighted in the course. Examples of these types of problems are: off-design operation of supersonic nozzles, supersonic windtunnels, blast waves, supersonic inlets, some methods of flow measurements and choking from friction or thermal effects. The course will culminate in the study of propulsion systems since many gas dynamics issues are inherent in these types of applications.

Topics Covered
1. Isentropic flow
2. Varying area flow
3. Nozzles
4. Normal shocks
5. Oblique shocks
6. Prandtl-Meyer expansion
7. Fanno flow
8. Rayleigh flow
9. Introduction to gas turbine engines

Available only to students who have not had compressible flow course.

ME  599  Special Topics in Aerospace Engineering: Atmospheric Sciences for AE/ME (3)
SEC.  010  CRN  47776  (Same as AE 599 002 CRN 42633)
TEXT:  Atmospheric Science; Wallace and Hobbs; Academic Press; 2nd Edition (February 15, 2006);
TIME:  Monday & Thursday  10:00 – 11:15  E-111
PROF:  Dr. Steve Brooks

Structure of the atmosphere, energy balance, turbulent boundary layer, satellite drag, aero-maneuvers and de-orbits, and hypersonic flight in the upper atmosphere. These will be extended to the Venusian, Martian and Jovian atmospheres.
